

Connect 500

Product Information Sheet

The Connect 500 is the latest product to be developed by Trakm8 and is the market leading 2G telematics device. The rugged, waterproof, IP69K rated device has been designed to provide Fleet Managers with some of the most precise vehicle and driver behaviour data available today.

With the most modern componentry available, the Connect 500 is the most powerful device in Trakm8's portfolio. It will give the user the ability to analyse driving behaviour, monitor the time drivers spend on the road, and see how much time they spend with customers more accurately than ever before.
